Attention: Dr. L.B. Nye – 401 Certification Unit

Dear Dr. Nye:

Subject: Request for Final Concurrence of Compliance, Clean Water Act Section 401 Water Quality Certification, Outfall 001 Drainage Sediment Control and Bank Stabilization Project, Unnamed Tributary to Bell Creek, Santa Susana Field Laboratory, Ventura County, California File Number 09-224

The Boeing Company (Boeing) recently submitted the 2011 Annual Report for the Outfall 001 Drainage Sediment Control and Bank Stabilization Project (submitted pursuant to the 401 Water Quality Certification [WQC] File No. 09-224). The Annual Report documented that no WQC-related field activities were implemented in 2011.

All authorized work was completed in 2010 at the project location. No additional work in the project area pursuant to the WQC will be performed, all conditions specified by the WQC have been met, and no further requirements are outstanding. Therefore, Boeing looks forward to receiving a verification letter from the Los Angeles Regional Water Quality Control Board stating that all conditions of the WQC (File No. 09-224) have been met and that the WQC has been terminated.

Thank you for the support you have given us on this project. Please contact me if you have any questions or wish to discuss this request.

Sincerely yours,

Paul J. Costa
